

PRINCIPAL'S PROJECT

Principal's Project is a kind of personality development program given to the students of 6th to 10th standard during their summer vacation, to inculcate their internal and eternal personalities. As the teaching and learning process should be continuous, especially in this project a situation was created and given to the students to enable them to learn indirectly.

This project includes a certification from the parents to their respective wards in recognition with their Good Work done during their vacation. The suggested Good Habits like respecting elders, maintaining good relationship within the family members, acquiring knowledge about our routine work (cleaning, cooking, washing, etc.,) were a part of this program.

Secondly, as the children should know their own family successors, a project named "Family Tree" was given and more interestingly most of the students has a record upto 4th and 5th generations.

The final aspect of the project is to involve them in doing a plantation work independently. Many students had worked and grown vegetable plants like lady's finger, tomato, bitter guard, etc., and enjoyed in harvesting in their own little farm.
